

LABORATORY MEDICINE SERVICES

Head: Dr. Simona Francesca Grignani

ARRIVE AT VIA PIOLTI DE' BIANCHI, 3

METHOD OF COLLECTING URINE SAMPLE FOR CYTOLOGICAL EXAMINATION

- Obtain the container holding the liquid preservative, provided by Casa di Cura Igea
The liquid in the container is potentially flammable.
Do not drink the liquid, avoid contact with eyes and keep it away from children.
- In the morning urinate normally in the w.c. emptying completely your bladder.
- Drink gradually half a liter of water in the next 3 hours.
- Collect in a clean container all the urine and then pour them in the provided container up to the notched mark.
- Deliver the sample to the clinic within 10:00 am.

WARNING

- *In case the samples required are more than one (for example three samples), it is necessary to repeat collection in different days. Take care to mark each container with the date and a progressive number (1,2,3).*
- *The samples must be stored in a fridge, and can be handed in all the same day, after the third day's contents have been collected.*

***Please be advised that this Lab exam in Casa di Cura IGEA
is executed Monday through Friday and
have to be booked in advance, either by phone nr. 02.70142555
or by email at prenotazioni@casadicuraigea.it***

➔ **Bring health card, social security number and identity card.**
