

LABORATORY MEDICINE SERVICES

Head: Dr. Simona Francesca Grignani

ARRIVE AT VIA PIOLTI DE' BIANCHI, 3

METHOD OF COLLECTING STOOL SAMPLE FOR COPROCULTURE

- Obtain a sterile container for the collection of stool equipped with an internal spoon.
- Expel the feces in a container like a "chamber pot" which has been sterilized with boiling water.
- Collect feces with the provided spoon in 3 or 4 points different areas of the feces, filling up about half of the container.
- If you cannot bring the sample to the clinic within a few hours, store the jar in the refrigerator or in a cool place, up to a maximum of 12/15 hours.

***Please be advised that this exam in Casa di Cura IGEA
is executed Monday through Friday and have to be booked in advance,
either by phone nr. 02.70142555 or by email at prenotazioni@casadicuraigea.it***

➔ **Bring health card, social security number and identity card.**
