

LABORATORY MEDICINE SERVICES

Head: Dr. Simona Francesca Grignani

ARRIVE AT VIA PIOLTI DE' BIANCHI, 3

METHOD OF COLLECTING STOOL SAMPLE FOR COPROCULTURE

- Obtain a sterile container for the collection of stool equipped with an internal spoon.
- Expel the feces in a container like a "chamber pot" which has been sterilized with boiling water.
- Collect feces with the provided spoon in 3 or 4 points different areas of the feces, filling up about half of the container.
- If you cannot bring the sample to the clinic within a few hours, store the jar in the refrigerator or in a cool place, up to a maximum of 12/15 hours.

*At Casa di Cura Igea you can make Laboratory Exams
from 07.30 to 10.00, without an appointment.*

COPROCULTURES ARE NOT COLLECTED ON SATURDAY MORNINGS

➔ Bring health card, social security number and identity card.
